## ABOUT US

### What we do

We support humanitarian and developmental projects both within and outside of Australia. We aim to serve people with empathy (heart) and effort (hands) in an effective manner (head). Together, combining the head, heart, and hands, we hope to stretch and realise every donation to its maximum potential.

### Our Mission

- To invest and bless communities in need with opportunities for further development, growth, and sustainability
- To empower and establish self-sustainability and progression for ordinary people to accomplish extraordinary achievements.
